Fit it & Forget it!

Since 1874

Explore Our Stylish Range of Water Heaters

SAY HELLO TO A. O. SMITH.

Founded in 1874 by Charles Jeremiah Smith, the A. O. Smith Corporation began as an engineering company in Milwaukee, Wisconsin. Today, we are the global leaders in making water heaters. This drives our pursuit for excellence when it comes to water purifiers as well. For the past 150 years, our singular purpose has been to create stellar products that deliver the best performance with the best technology. And to this day, we live strongly by that belief.

150 years of innovation.

A. O. Smith enjoys a rich history of achievements. A glimpse at our 150-year history reveals numerous engineering and technical achievements.

1874

Started operations

1889-1906

Foray into the bicycle industry and over the years became North America's largest automobile frame manufacturer

1936-1954

Patented the glass line technology and introduced the first glass-lined commercial water heater

1995

Joint venture in China

2008

Started operations in India

2010

Factory set up in Harohalli, near Bengaluru - Water Heater Manufacturing begins

2015

Entry in Water Purification-Pioneers in introducing the Hot Water feature

2020-2023

Launched industry-defining products in Water Heaters and Water Purifier series in India

2024

A. O. Smith celebrates 150 years of integrity, innovation and customer satisfaction in its business locations across the globe.

The Blue Diamond® Story.

A. O. Smith was credited with the invention of the glass-lined water heater tanks in 1936. After this, the next breakthrough was the Blue Diamond® technology in 2004. In this technology, a specially formulated glass frit is bonded to the steel through a complex process that is carried out at over 800°C. The Blue Diamond® Glass-Lining technology reduces scaling accumulation on the tank caused by minerals, corrosion due to hard water and leakage of heat into the atmosphere. It also enhances the strength and durability of the tank.

A. O. Smith water heaters come with Blue Diamond® Glass-Lining technology, replacing the earlier stainless steel water heaters that were prone to rusting, corrosion and scaling due to the contact between hot water and steel.

This **Blue Diamond® technology** provides twice the corrosion resistance compared to industry standards and increases the life span of the tank.

FIT IT & FORGET IT !

"Fit it and Forget it!" encapsulates our commitment to durability and reliability. Our products are engineered with high-quality components designed to withstand the rigors of long-term use. Our unique and innovative Blue Diamond® Glass Lining technology and robust 2mm thick steel tank, excel even in challenging water conditions. Moreover, our products boast best-in-class safety features, ensuring a trouble-free experience that lasts. Discover more about our key features...

Ti Steel Tanks

A. O. Smith water heaters now come with a specially designed Titanium steel tank that ensures sturdy construction, longer life and superior quality that is unmatched. The Titanium steel combined with our patented Blue Diamond® coating is the most technologically advanced combination & gives A. O. Smith water heaters resistance to corrosion even in hard waters.

Advanced PUF Technology

The advanced PUF injection ensures uniform and high density foam distribution. Complete coverage of the PUF in between the tank & outer jacket greatly reduces the heat loss. This ensures maximum energy efficiency and power savings.

Fold Back Heating Element

Fits the shape of the tank, ensuring uniform heating and continuous and maximum availability of hot water.

Thermal Cut-Out for Safety

If the water temperature exceeds the highest preset limit then this automatically cuts off the power supply to the water heater for your family's safety.

Long-Lasting Anode Rod

A customised alloy that works even in hard water conditions to protect the tank and has 2X lifespan as compared to a magnesium alloy commonly used in most water heaters.

Glass-Coated Heating Element*

Incoloy heating element protected by glass coating to prevent scale formation and extend the life of heating element.

SMARTNESS at your FINGERTIPS.

Hot water requirements vary depending upon the usage. A. O. Smith water heaters are designed to understand this variation and provide hot water accordingly. With different modes ranging from pedicure to double shower, A. O. Smith water heaters are equipped with pre-defined Smart modes, which are convenient and save electricity.

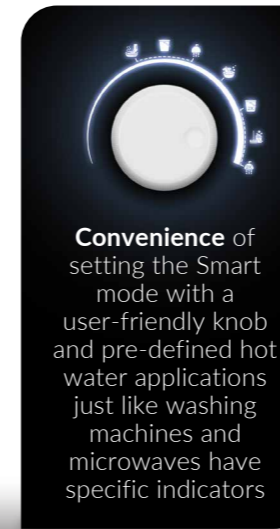

Smart Modes enable...

3C Conservation of Electricity
 Convenience to the customers
 Choice of varied applications

3C Advantages

Conservation of electricity as consumers may choose to use water heater only for specific hot water requirements

Convenience of setting the Smart mode with a user-friendly knob and pre-defined hot water applications just like washing machines and microwaves have specific indicators

Choice of Varied applications like pedicure, washing clothes, Double bucket bath and many more

Series

In addition to water heaters, we've also brought international standard water purifiers to India. Our range of water purifiers offer everything you've thought of, and more. Engineered with the finest technologies, our water purifiers are intuitive, efficient and beautiful. Whether it's top of the line, 5 star rated* A.O. Smith ProPlanet series, Green series, the invisible under the counter models Z2+ and X5+ or the UV models Z1 and X2, find one that best suits your needs.

Ordinary RO water purifiers use four glasses of water to make just one glass of clean water. But A. O. Smith water purifiers with Advance Recovery Technology™ (ART™) save 2X more water*. With high water recovery of 60% in ProPlanet series, you save more than 9000L of water annually*, which is potentially enough for 2 families of 4. Unlike ordinary RO purifiers, the water doesn't bypass the RO membrane. Instead, we pass 100% of the water through it. What this means is that all the water is purified with minimal wastage.
